RE: Postponement of Lamplighter Pond Maintenance project  
City project no. 4022-4001

Dear Community Member:

Due to the unseasonably warm winter, the city is postponing the Lamplighter Pond Maintenance project until next winter. Frozen conditions are necessary to protect the pond and the surrounding habitat from the impacts of heavy equipment needed to carry out the project.

The project is routine dredging meant to ensure the continued function of the pond to collect and treat stormwater runoff.

Postponement will not negatively impact the water quality of the pond and downstream lakes and streams.

The city will keep you updated on the revised status of the project via mail and the city's website at [bit.ly/lamplighterpond](https://bit.ly/lamplighterpond).

Please contact me at 952.924.2690 or [efrancis@stlouisparkmn.gov](mailto:efrancis@stlouisparkmn.gov) with any questions or concerns.

Sincerely,

Erick Francis  
Water resources manager
